## A Special Issue of *Asian Journal of Control*

### Recent Developments in Multidimensional Systems, Control and Signals—Theory and Applications

The key unique feature of a multidimensional (nD) system is the dependency of the plant or process dynamics (input, output, and state variables) on more than one indeterminate and hence information is propagated in many independent coordinate directions. Many physical processes have a clear nD structure. Additionally, the nD approach frequently is used as an analysis tool to assist, or in some cases to enable, the solution of a wide variety of problems. What makes multidimensional systems theory to an exciting field of research is the fact that applications areas for such system classes can be found within a broad spectrum of disciplines like Systems, Control and Signal Processing (and many others). The purpose of this issue is to provide the choice of recent interesting developments in various aspects of multidimensional (nD) systems, related to theory and applications.

#### GUEST EDITORS

**Prof. Krzysztof Galkowski**

University of Zielona Gora and Nicolaus Copernicus University  
in Torun, Poland

E-mail: k.galkowski@issi.uz.zgora.pl

**Prof. Eric Rogers**

University of Southampton  
United Kingdom

E-mail: etar@ecs.soton.ac.uk

#### IMPORTANT DATES

June 30, 2008	Call for Papers
Feb. 28, 2009	Deadline for Paper Submission
June 30, 2009	Completion of First Review
Oct. 30, 2009	Completion of Final Review
Mar. 30, 2010	Publication (Tentatively Vol. 12, No.2)

#### SUBMISSION

<http://www.ajc.org.tw>

Potential authors are strongly encouraged to upload the electronic file of their manuscript (in PDF format) through on-line submission interface on the journal website <http://www.ajc.org.tw>. In case you encounter any submission problem, you are free to contact Prof. Li-Chen Fu, Editor-in-Chief of Asian Journal of Control at

**Professor Li-Chen Fu**

Department of Electrical Engineering, EE II-524  
National Taiwan University  
Taipei 10617, Taiwan

Tel: +886-2-3366-3558  
Fax: +886-2-2365-4267  
E-mail: lichen@ntu.edu.tw

All submission should include a title page containing the title of the paper, full names and affiliations, complete postal and electronic address, phone and fax numbers, an abstract and a list of keywords. The contacting author should be clearly identified. For more detailed information about manuscript preparation, please visit <http://www.ajc.org.tw>.
